

Exhibit No. 1

Date 2-19-07

Bill No. SB 312

SB 312

Principles:

Privileging should be done solely on the basis of training, experience and quality.

Privileging should not be contingent on participation with insurers.

All physicians should have access to medical staff leadership (hospitals can choose to change their bylaws to limit access to medical staff president, for example).

This bill should not prohibit exclusive contracts.

This bill should not prevent hospitals from restricting access to the governing board by conflicted physicians.
